To Members of the Press

SOLIZE PARTNERS Corporation

**SOLIZE PARTNERS Signs “Consulting & System Integration Partner Program”  
Agreement with Dassault Systèmes  
—Promoting Process DX Through Digital Technologies as Partners in Japan—**

SOLIZE PARTNERS Corporation (Headquarters: Chiyoda-ku, Tokyo; Representative Director and President: Yusuke Inoue) has entered a “Consulting & System Integration Partner Program” agreement with Dassault Systèmes in Japan (Headquarters: Shinagawa-ku, Tokyo; Managing Director, Japan: Philippe Godbout) to contribute to the sustainable development of the manufacturing industry. Through this partnership, the two companies will work together to improve operational efficiency, reduce costs, break down organizational silos and drive innovation across Japan’s manufacturing industry.

## ■ Background and Purpose of the Partnership

Drawing on more than 35 years of experience supporting product development, SOLIZE PARTNERS leverages 3D printing and digital technologies to support the entire product development process, from design to mass production, while enhancing development speed, quality and efficiency.

Founded in 1981, Dassault Systèmes provides a portfolio of solutions for industries in the manufacturing, life sciences and healthcare, and infrastructure and cities sectors. The company's 3DEXPERIENCE platform integrates capabilities for 3D modeling, simulation, collaboration and data intelligence.

The two companies recognized that by combining SOLIZE PARTNERS' strengths—deep knowledge, experience, and extensive resources in manufacturing—with Dassault Systèmes' solution portfolio, which covers the entire process from brainstorming to design, evaluation and production, they can provide more comprehensive and higher-value solutions in response to the increasingly complex manufacturing challenges. This shared vision led to the formation of this partnership.

Going forward, the two companies will build on this partnership to further accelerate efficiency, sustainability, and innovation in the manufacturing industry by combining their respective strengths.

## ■ Value and Role Provided by SOLIZE PARTNERS as a Partner in Japan

Although digital solutions continue to evolve rapidly, many manufacturers have not completely realized the full potential of the solutions they have deployed. Additionally, the effective use of data on the grounds also plays an important role in using these solutions. There are often challenges where knowledge captured through the experience of skilled engineers —such as data generated during the design reviews and engineering studies — has either not been retained or is fragmented.

SOLIZE PARTNERS continuously evaluates, adopts and applies emerging digital technologies, enabling a deep understanding. At the same time, customers' valuable data -including design and development data, equipment data and customer data- is organized so that it can be used across different areas. By proposing optimal strategies for leveraging this data, SOLIZE PARTNERS enables data utilization across departments and processes. Together with customers, SOLIZE PARTNERS builds a “connected digital engineering environment” that supports rapid and accurate management decision-making and helps transform manufacturing operations.

### ■ Long-Standing Partnership Between the SOLIZE Group and Dassault Systèmes

The partnership in Japan builds on a long-standing relationship between the SOLIZE Group and Dassault Systèmes.

SOLIZE PARTNERS India Private Limited, a subsidiary of SOLIZE PARTNERS (Head Office: Bangalore, India; CEO & Director: Mahadevan V. S), has been collaborating with Dassault Systèmes for more than 25 years. The company delivers consulting, implementation and support services across the complete Dassault Systèmes portfolio, including CATIA, ENOVIA and DELMIA applications, and the 3DEXPERIENCE platform.

Similar to Japan's market, India's manufacturing industry also faces challenges such as shorter development lead times, strict budget management and rising customer requirements. SOLIZE PARTNERS India has helped organizations accelerate digital transformation (DX) challenges through Dassault Systèmes' solutions and is recognized as one of its leading partners in India.

The series of initiatives under this partnership is part of the SOLIZE Group's efforts to further expand its technologies and expertise globally. As a design engineering firm that continues to advance digital manufacturing, SOLIZE will work with Dassault Systèmes to contribute to solving the challenges faced by manufacturing customers through digital-enabled process transformation.

### ■ Comment from Yusuke Inoue, Representative Director and President of SOLIZE PARTNERS Corporation

This partnership will accelerate operational transformation and innovation adoption in Japan's manufacturing industry. To enhance the competitiveness of the manufacturing industry, it is essential not only to introduce digital solutions, but also to create and embed use cases that are directly connected to customer value.

By connecting the frontline knowledge and advanced engineering capabilities cultivated by the SOLIZE Group with solutions centered on Dassault Systèmes' 3DEXPERIENCE platform, SOLIZE PARTNERS will seamlessly link data from design through mass production and improve quality, reduce cost and accelerate speed-to-market at the same time.

**■ Comment from Mahadevan V. S, President of SOLIZE PARTNERS India Private Limited**

For more than 25 years, SOLIZE PARTNERS India and Dassault Systèmes in India have worked together to support manufacturers in addressing complex engineering challenges through digital transformation. Together, we have delivered solutions across automotive, aerospace and defense and industrial equipment and are now exploring into life sciences, energy, and consumer goods.

This partnership in Japan marks a new milestone in our long-standing cooperation.

The SOLIZE Group and Dassault Systèmes will leverage their collective strengths to provide even greater value to customers in Japan, India, and international markets.

**■ Comment from Philippe Godbout, Managing Director, Japan, Dassault Systèmes**

We are delighted to establish a partnership with SOLIZE PARTNERS Corporation.

By combining SOLIZE PARTNERS' extensive expertise and proven implementation capabilities in the manufacturing industry with Dassault Systèmes' 3DEXPERIENCE platform, we can provide better support for the digital transformation of our customers in Japan. Through our collaboration with SOLIZE PARTNERS, Dassault Systèmes will continue to support Japanese manufacturers in leveraging Virtual Twin Experiences to create new value.

**■ SOLIZE PARTNERS Corporation**

Established: January 2025

Location: 3F, Sanbancho UF Building, 6-3 Sanbancho, Chiyoda-ku, Tokyo

Representative: Yusuke Inoue, Representative Director & President

Capital: 10 million yen (100% of SOLIZE Holdings Corporation)

Number of employees: 1,317 (as of December 2025)

Business description: Product development contracting, Engineer dispatch, Consulting,  
3D printing prototyping, Final product production, Introduction of 3D  
printer equipment, sales and construction of engineering systems.
